And especially

Rhonda Simpson, my wife, who puts up with my Pentel obsession, and for her editorial help.

I decided to compile this book to help put together the history of Pentel Mechanical Pencils and help in identifying some of these rare pencils. There are so many Pentel pencils that I did not even realize existed when I started this project. There are a lot of limited-edition pencils that are not listed here, but I do not plan to add those, as other than the P200 pencils, I do not have a good list of those limited editions. The Pop'npop and Olympic pencils are included here since they cross models.

Here is some terminology that I use in this book that helps to differentiate between different pencils that are either similar or very different model numbers.

**Generations:** Not covered extensively in this book, these are minor incremental changes, such as the change from a metal lead reservoir to plastic reservoir or other small changes. The QE415 change in the text on the side of the pencil is an example of a Generation change.

**Version:** This is now defined as a major change to a pencil, but still recognizable as the same model: the addition of the rubber grip to the PD345 is a good example of a Version change.

**Type:** This is a major difference in a model number. Arguably these would be different pencils, but Pentel assigned the same model number to them. The complete design change of the P245 is one example.

With this publication, there are 10 new Pentel pencils and 10 new branded pencils in this book. Also, the SG33/SG35 and the SG45 have been merged into their proper model, SV/SV5.

I make no claim on the images that I sourced from websites or catalogs. These are just used to help identify these pencils. If you see your images in here, and would like me to remove them, please contact me at the email below. Or, if you would like to give me specific permission to use them, please contact me and let me know how you would like the images credited.

Book versions are based on the latest catalog that is included in this book, plus a sub number. For instance, this book is the 3<sup>rd</sup> published iteration of the Book based on the inclusion of 2023 catalogs.

## 350 Pencil

Image Source Jimmy Simpson

Size 0.5  
Base Colors D Green / E Brown  
Years Available 1962 to mid-60's  
Mfg Country Japan  
Dist Country Japan  
Dimensions Overall: 138.6mm / 136.6mm  
Reservoir Cap: 9.9mm  
Body: 110.4mm  
Tip: 18.3mm / 16.3mm

### Text reads:

PENTEL 350D 0.5mm MADE IN JAPAN

PENTEL 350E 0.5mm MADE IN JAPAN

This model appears to be an early version of the Sharp 5 (PS-350).

At various times, these were available in a 2mm and a 4mm tip.

You will often see the Green P350D listed as a 3500 on auction sites, by unobservant sellers.

## BS5 Black Sharp 5 Pencil

Image Source Jimmy Simpson

Size	0.5
Base Colors	Black
Years Available	1970 to Mid-70's
Mfg Country	Japan
Dist Country	Japan
Price Tags	¥500
Dimensions	Overall: 141mm Eraser Cap: 11mm Body: 68mm Grip: 44mm Tip: 18mm

The BS5 pencil appears to be a precursor to the PS535, and uses the same body/grip, but has a fixed tip. It was originally shown in the Pentel Japan 1970 One-Sheet as the Black Five.

Based on the ML5 and the ML51 being Silver and Black bodies, we originally designated this as the S551, since it appears to be a Black body version of the S55. Since then, we have discovered photos of a box of these pencils, and it was positively identified as the BS-5. But the way that the S55 was originally designated S-55, this is now listed as the BS5.

Extender: 19.9mm  
Body: 101.0mm  
Tip: 20.3mm

### Text reads:

PENTEL GRAPH PENCIL JAPAN D-3

PENTEL GRAPH PENCIL MADE IN JAPAN #

PENTEL GRAPH PENCIL MADE IN JAPAN 4

HB Pentel GRAPH PENCIL JAPAN E-7 [Note the Pentel on this pencil is the new logo]

I believe the D-3, E-7 and the 4 are mold marks.

Early version of the Graph series of pencils. I believe the Red and Green pencils above are the earliest versions, due to the single digit mold mark. The top black pencil would be next with the D-# mold mark.

The bottom pencil (which is missing pieces) is included due to the lead hardness printed on it, and to show the new Pentel logo printed in the cutout. It should probably be the final version of the pencil, coming out in late-1970 or later. Also, it has the highest mold mark, starting with E-#.

Winner of the 1966 Good Design Award.

## Graph II Mechanical Pencil

Image Source Jimmy Simpson

Size	0.5
Base Colors	Black Body, Yellow Band
Years Available	Early-70's
Mfg Country	Japan
Dist Country	Japan
Dimensions	Overall: 148.6mm Reservoir Cap: 7.8mm Extender: 18.0mm Ring: 8.1mm Body: 94.4mm Tip: 20.3mm

This pencil is the immediate precursor to the PG5.

The only real external difference between the Graph II and the PG5, is the text of the lead indicator is larger and bolder on the Graph II. The major differences are primarily internal, with the area marked "Connector" above being a molded piece of the body on the Graph II and a separate white piece (with a sticker listing the lead sizes attached) on the PG5. A second major difference is that on the Graph II, the lead reservoir screws in from the front (with the larger thread, seen above), and on the PG5, it drops in through the back, and is held in place by the chrome tip [See the article "Graph II vs PG5" in Appendix B].

## Graph For Film Mechanical Pencil

Image Source Jimmy Simpson

Size	0.5
Base Colors	Black with White Ring
Years Available	Early-70's
Mfg Country	Japan
Dist Country	Japan
Dimensions	Overall: 148.6mm Reservoir Cap: 7.8mm Extender: 18.0mm Ring: 8.1mm Body: 94.4mm Tip: 20.3mm

This series of pencils was designed for Drafting Mylar or Polyester film, to go over a document, so you can "write" on it without destroying or damaging the original.

The design of this pencil is based on the Graph II with the single piece Body & Connector.

There is a Pentel For Film Set that comes with this pencil, 3 sets of Film Lead (P1, P2 & P3), a Faber-Castell Filmar for Drafting eraser, an instruction sheet and a plastic folio.

## Hi Black ML5 Pencil

Image Source Jimmy Simpson

Size	0.5
Base Colors	Black
Years Available	Late-70's
Mfg Country	Japan
Dist Country	Japan
Price Tags	¥700
Dimensions	Overall: 130mm Eraser Cap: 10mm Body: 71mm Grip: 34mm Tip: 15mm

This pencil was probably released to promote a darker versions of lead, the C-405 Hi Black lead. It apparently shipped with B lead, instead of the normal HB.

This version of the Hi Black is the same form factor as the ML5.

The Date Code is stamped on the lead reservoir in yymmdd format. The example I have is 780522.

## MEC / MEC2-5 Mechanica Pencil

Image Source Jimmy Simpson

Size	MEC 0.3 MEC2-5 0.5
Base Colors	MEC - Red Band MEC2-5 - Yellow Band
Years Available	MEC 1968 to 2002 MEC2-5 1970 to 2002
Mfg Country	Japan
Dist Country	Worldwide
Price Tags	MEC ¥3000 MEC2-5 Early ¥2000, Later ¥3000
Dimensions	Overall (Shield retracted/extended): 148.0mm / 149.5mm Plunger: 6.0mm Extender: 6.9mm Hardness Ring: 7.9mm Body: 82.4mm Grip: 30.1mm Shield (Shield retracted/extended): 3.7mm / 16.2mm Tip (Shield retracted/extended): 11.0mm / 0.0mm

Pentel's flagship drafting pencil, the original Mechanica was the first 0.3mm pencil released by any company. In general, the grip on the MEC had 12 grid rows with the grooves being inked. The MEC2-5 had 14 rows, not inked. For both the MEC and the MEC2-5, the designs fall into 3 general periods.

Early Period– 1968 (1970 for the MEC2-5) to around 1972

Grip Text: ↔PENTEL |Y|echanica Ring Text: MADE IN JAPAN

The Late Early period MEC has a thicker text on the grip.

Middle Period – Around 1972 to 1990

Grip Text: Pentel Mechanica 0.3 (or 0.5) Ring Text: JIS S 6013 (♻️) Display permission 375127 MADE IN JAPAN

I believe Pentel received their JIS permit in 1975, so I suspect, but cannot say for sure, that the Early

Middle pencils did not have the JIS information on the Ring.

Late Period – 1990 to 2002

Grip Text: Pentel Mechanica 0.3 (or 0.5) Ring Text: [none]

Winner of the 1969 Good Design Award and the 1985 Good Design Long Life Design Award.

## Middle 5 Deluxe (ML5 Deluxe) Mechanical Pencil

Image Source Jimmy Simpson

Size	0.5
Base Colors	Silver
Years Available	1970 to early-70's
Mfg Country	Japan
Dist Country	Japan
Price Tags	¥1000
Dimensions	Overall: 131.3mm Eraser Cap: 11.4mm Body: 70.0mm Grip: 35.0mm Tip: 14.9mm

This pencil was identified by the translation of the label in a packaged pencil. There was not a model number, just "Middle 5 Deluxe". Middle 5 is what the ML5 is commonly called in Japanese translations.

# Pentel Pencils Identification Book

## ML3† Sharp "Middle" Pencil

† (Tentative Designation)

Image Source Jimmy Simpson

Size	0.3
Base Colors	A Black / B Red / C Blue
Years Available	Early-70's
Mfg Country	Japan
Dist Country	Japan
Price Tags	¥500
Dimensions	Overall: 130mm Eraser Cap: 10mm Body: 71mm Grip: 34mm Tip: 15mm

I ordered this pencil as a Pentel 3, and I assumed it was a PS513, as that is the only executive style pencil I have found cataloged like this before.

But upon receipt, I find that it has a 0.3mm FIXED tip, instead of a Sliding Sleeve tip. The pencil, and the tip, are the same form factor as the ML5 (0.5mm). I find several of these in auctions, now that I know what to look for.

Although related to the ML5 tip, it is the only pencil I have found with the 0.3mm of this style. The only other "Executive" style pencils in 0.3mm, that I know of, are the PS513 and SV/SG33, which have completely different style tips.

This has been tentatively designated as an ML3 pencil. It is the same as the PS513, with a fixed tip.

## P203 / P205 / P207 / P209 Sharp Pencil

Image Source Jimmy Simpson

Size	0.3 / 0.5 / 0.7 / 0.9
Base Colors	0.3 E Brown 0.5 A Black / B Burgandy / D Green 0.7 C Blue 0.9 G Yellow
Years Available	1970 to Current P203 - Mid-70's to Current
Mfg Country	Japan - 1970-Current Brazil - About 2003-Current France - Assembles some Limited Edition pencils
Dist Country	Worldwide
Dimensions	Overall: 143.7mm Eraser Cap: 11.4mm Body: 112.0mm Tip: 20.3mm

I suspect that the 11 rings on the grip of the P200 type pencils is a tribute to it's predecessor pencil, the Pentel 11. Beginning about 2010, Pentel Japan started releasing Limited Editions of the P200 pencils, primarily the P205. About the same time, Pentel Brazil also began Limited Editions of all sizes.

Date Codes may be either stamped (70's-early 80's) on the lead reservoir in yymmdd format or (80's & later) stamped or printed under the band of the clip, in line with the printed text.

## P215 / P217 / P219 Sharp Pencil

Image Source Jimmy Simpson

Size	0.5 / 0.7 / 0.9
Base Colors	0.5 A Black / N Gray 0.7 C Blue / C Dark Blue 0.9 G Yellow / B Red
Years Available	Early - 1992 to 1994 Later - 1994 to early-00's
Mfg Country	Made in Japan Assembled in Uruguay
Dist Country	Worldwide
Dimensions	Overall: 143.7mm Eraser Cap: 11.4mm Body: 112.0mm Tip: 20.3mm

Supposedly for Pentel's Corporate Accounts, this pencil has gone through changes in the short time it was available. Initially it was released in the same colors as the corresponding P200 pencil, but with gray text and a short carry clip. In 1994, Pentel changed the color scheme and kept that up to the end of production.

The Date Code is stamped under the clip band at the end of the line of text. The early pencils (top 3) have date codes 2E, 2D & 2F, representing April to June 1992. The later pencils have codes 4G, 4G & 0J, representing July 1994 and October 2000.

Mfg Country Japan  
Dist Country Japan  
Price Tags ¥300

It has taken a while to finally identify this pencil, but a photo of a box turned up identifying it as the P305. It is an unusual pencil with the diamond patterned grip, although there is a more modern pencil (P35 Hue) that has a similar, but more 3-D pattern.

This was originally cataloged as Unknown Model 01.

## P323 / P325 / P327 / P329 Sharp Pencil

Image Source Jimmy Simpson

Size	0.3 / 0.5 / 0.7 / 0.9
Base Colors	0.3 E Brown 0.5 A Black 0.7 A Black (early) / C Blue 0.9 A Black (early) / G Yellow
Years Available	1970 to about 2007
Mfg Country	Japan
Dist Country	Japan
Price Tags	Early ¥300, Late ¥500
Dimensions	Overall: 143.7mm Eraser Cap: 11.4mm Body: 112.0mm Tip: 20.3mm

Prior to the 5th Generation (pictured above, with the square stickers - produced in the 80's to end of life), the P325, P327 & P329 pencils were produced without any text on them, and the P327 & P329 were sometimes produced in Black or their appropriate colors.

The P323 began being produced in the late 70's with text printed on the side.

I suspect that the 11 rings on the grip of the P320 pencils is a tribute to it's predecessor pencil, the Sharp 11.

Dimensions	Overall [Capped / Posted]: 122.6mm / 121.6mm Eraser Cap: 11.5mm End Cap: 13.1mm Body: 83.0mm Tip: 14.0mm Tip Cap: 15.0mm

Like the PMG, this model has a metal sleeve to protect the tip.

Model number and description come from the Pentel shipping box. Date comes from Yahoo Japan listings where some have a small triangular sticker (1975 & before) and some have a large triangular JIS sticker (1976 to early 1980's).

Originally, this was just listed as model Sharp L, but on closer examination of the photo of the box, I discovered the P515 model number.

The price was probably originally ¥500, since the model number starts with a 5, but I have never seen one with that price tag.

## P533 Sharp Pencil

Image Source Jimmy Simpson

Size	0.3
Base Colors	A Black
Years Available	Mid to late-70's
Mfg Country	Japan
Dist Country	Japan
Price Tags	¥500
Dimensions	Overall: 143.7mm Eraser Cap: 11.4mm Body: 112.0mm Tip: 20.3mm

I am not sure why this pencil was released as a stand-alone number, but I suspect it may be a precursor to the P323.

## P545 Version 1 "Short" Sharp Pencil

Image Source Jimmy Simpson

Size	0.5
Base Colors	B Red / D Green / G Yellow Band
Years Available	Early to mid-70's
Mfg Country	Japan
Dist Country	Japan
Price Tags	Early - ¥500 Late - ¥700
Dimensions	Overall: 131mm Eraser Cap: 11mm Body: 63mm Grip: 33mm Ring: 5mm Tip: 20mm

Unique tip marks this pencil. Unusually, this pencil appears to come in two sizes, with one (Version 2) possibly being a second model number (unknown), or an earlier/later version. And to make things more interesting, neither body appears to be used on any pencil, except the P545, so it does not appear to be a case of using other pencil parts. According to pictures I have found online of the pencils in a Pentel tray, marked P545 (which is how it has been identified), it appears that the shorter Version 1 is definitely a P545, which leaves the question about what the longer pencil is.

## P575 "Crew" Pencil

Image Source Jimmy Simpson

Size 0.5  
Base Colors A Black / B Red / C Blue / D Green  
Years Available 1977 to late-70's  
Mfg Country Japan  
Dist Country Japan  
Price Tags ¥500  
Dimensions Overall: 136.0mm  
Eraser Cap: 11.0mm  
Body: 110.1mm  
Tip: 14.9mm

Says "CREW" below the clip.

P575 Form Factor.

The P575 Crew, the P595 Pop'npop, the Rush on Goal and the PS35/PS45/PS65 all have similar form factors.

The P575 was manufactured first in about 1977, and has a flat tip end (of the body) and flat bottomed tip. The lead reservoir appears to be aluminum.

The Date Code is stamped on the lead reservoir in yymmdd format. Known Date Codes are between 770209 to 770628.

## P595 Pop'npop Pencil

Image Source Jimmy Simpson [1-3] | KnockType11 [4]

Size 0.5  
Base Colors P Pink / S Sky Blue / V Purple / Z Silver  
Years Available Late-70's to early-80's  
Mfg Country Japan  
Dist Country Japan  
Price Tags ¥500  
Dimensions Overall: 137.3mm  
Eraser Cap: 10.9mm  
Body: 110.3mm  
Tip: 16.1mm

Says Pop'npop 4 times on each side of the pencil (8 total).

P575 Form Factor.

The P575 Crew, the P595 Pop'npop, the Rush on Goal and the PS35/PS45/PS65 all have similar form factors.

Both the P595 and Rush on Goal were manufactured around 1979 to 1981 and have a tip with an extended lip that fits into a recess in the body. Again, the lead reservoir appears to be aluminum.

The Date Code is stamped on the lead reservoir in yymmdd format. Known Date Codes are between 790724 to 801202.

## P805 Sharp Pencil

Image Source Jimmy Simpson

Size	0.5
Base Colors	Black / Navy Grip - Silver Body
Years Available	Mid to late-70's
Mfg Country	Japan
Dist Country	Japan
Price Tags	¥800
Dimensions	Overall: 130mm Eraser Cap: 9.5mm Body: 86.5mm Grip: 19.2mm Tip: 14.8mm

This pencil is a good example of how we investigate and dig to find out model numbers of some of these older pencils. At first this was believed to be a P1075, since aside from the color this is effectively the same pencil as those. But the (actual) P1075s that still had Japanese price stickers were ¥1000, and the price stickers associated with these pencils were ¥800. Looking at other 'P' model pencils and the prices they were released at meant that this pencil should be a P8x5 pencil, and someone on a Yahoo Japan auction called it a P875 in an auction. This made a lot of sense, so for a year or so, in this book, we were calling this a P875.

Now, the holy grail of identification, for unmarked pencils, is either a catalog from that era or a box that clearly identifies the pencil and model. In this case, it was a page from a late-70's Japanese catalog that showed the P1075 and this pencil, identifying it as a P805. Thinking about it, this number makes even more sense, because in general Pentel increments the series number (second digit from right), from 0 to 9, for instance P205, P215, P225, but there are holes, for instance P235, that may be still unknown models or pencils that were designated, but then scrapped before release.

Pencils made after 1975 have the 6-digit date code stamped (yyymmdd format) on the lead reservoir. The pencil above has the date code of 771015.

Formerly referred to as the P875, it has been confirmed to be the P805.

## P1005 / P1007 (Version 1) Silver Excalibur Pencil

Image Source Jimmy Simpson

Size	0.5 / 0.7
Base Colors	Stainless Steel
Years Available	1970-71
Mfg Country	Japan
Dist Country	P1005 - Japan P1007 - USA
Price Tags	P1005 - ¥1000 P1007 - \$7.50
Dimensions	Overall: 138.6mm Eraser Cap: 8.1mm Body: 70.2mm Grip: 42.1mm Tip: 18.2mm

I discovered this pencil on the Wayback Machine for Germ's Pencils11 blog. He had a picture of all of his Excalibur and SG pencils, and there were a number of them that I had not seen before. Later, I found another picture of it (see links at bottom of page). In 2022, I won the bottom pencil in an auction and it turned out to be a 0.7mm. In early 2023, an auction came up with a box of the 0.5mm versions, that was labeled P1005, so that makes my version a P1007.

I believe that these pencils were the first Excalibur pencils from back in late 1970 or early 1971. It has the Excalibur Crown above the name "Pentel", stamped into the metal of the body. If you look at the Crown, it is a line drawing, where all others were outlines or filled Crowns (see Appendix B Excalibur article). Later Excalibur pencils are all printed on with the Crown above the name "Excalibur". The R10 Rolling Writer that it came with in the set, also had the Crown above Pentel, and had the Scepter ring in the middle, not the "gear" or "crown" ring. Another point in favor of it being one of the first, is that this is not the form factor that all other Excalibur Crown pencils use. This was probably the only Excalibur of this style, when Pentel decided to split this style off to be the Scepter pencils. All later Excalibur Crown pencils stayed with the SG-style body. This version P1007 was available in a set (EX15) with a matching R-10 as seen in the 1971 US Excalibur brochure.

This was formerly cataloged as Unknown Model 11.

# Pentel Pencils Identification Book

## P1007 (Version 2)† Silver "Excalibur" Pencil

† (Tentative Designation)

Image Source Jimmy Simpson

Size	0.7
Base Colors	Stainless Steel
Years Available	1972-1973
Mfg Country	Japan
Dist Country	USA
Dimensions	Overall: 132mm Eraser Cap: 8.5mm Body: 63mm Grip & Ring: 48.5mm Tip: 12mm

I received this pencil in an Excalibur set with an R10 Excalibur pen, and I think that this pencil was a stop-gap "Excalibur" pencil.

What I believe happened, is that after the run of the first P1007 pencils was sold out, but before the Version 3 were released, Pentel USA still needed to sell some Excalibur sets. Knowing that Version 2 would be an SG-style, they had these made from SV bodies, but with 0.7mm mechanicals and tip, plus the "7" stamped onto the body.

Check out the SG7 Version 2 for more information on why I believe this is the case.

## P1007 (Version 3) Silver Excalibur Pencil

Image Source Jimmy Simpson

Size	0.7
Base Colors	Stainless Steel
Years Available	Mid-70's to Late-80's
Mfg Country	Japan
Dist Country	Worldwide
Dimensions	Overall: 132mm Eraser Cap: 8.5mm Body: 63mm Grip & Ring: 48.5mm Tip: 12mm

The P1007 is a match for the R10 Excalibur Pen. It was available with the matching R10 in the Excalibur gift set, EX-12. The P1007 is the 0.7mm version of the PX20 (0.5mm) that was only available in Japan.

# Pentel Pencils Identification Book

## P1025 Sharp 5 W-Knock Pencil

Image Source Jimmy Simpson

Size	0.5
Base Colors	White w/ Black grip
Years Available	Early-70's
Mfg Country	Japan
Dist Country	Japan
Price Tags	¥1000
Dimensions	Overall (retracted/extended): 140.3mm / 138.8mm Eraser Cap (retracted/extended): 14.2mm / 8.5 mm Body: 70.9mm Grip: 40.0mm Tip (retracted/extended): 15.2mm / 19.4mm

For a long time, the P1025 pencil was simply referred to as a W-Knock, but recently it has been identified by auctions of sets of these in the shipping box.

Per a Reddit user, "I don't know any Korean, but I know about W and double in Japanese, so here it is in the hope that it might help: AFAIK Japanese people read the letter 'double-u' and 'double' the same (as 'da-bu-ru') because the 'u' at the end is silent (or just makes the ending 'u' sound a bit longer). So, in some cases the letter 'W' is used instead of writing the word 'double'."

This is a very intricate pencil, and operates with 7 floating pieces surrounding the lead reservoir, making it more complicated than I have seen on any other Pentel pencil.

Originally referred to in earlier books as Unknown Model 05.

## P1035 / P1037 Sharp Kerry Pencil

Image Source Jimmy Simpson

Size	0.5 / 0.7
Base Colors	0.5 A Black / B Red / C Blue / D Green / E Brown / KD Olive Green / ND Gray / PD Pink 0.7 A Black / C Dark Blue
Years Available	0.5 1971 to Current 0.7 2000's to Current
Mfg Country	Japan
Dist Country	Worldwide
Price Tags	¥1500
Dimensions	Overall [Capped / Posted / No Cap]: 125.1mm / 132.3mm / 106.3mm Cap [Capped / Posted]: 64.2mm / 68.6mm Reservoir Cap: 5.3mm Body, Back: 38mm Body, Center Ring: 18mm Grip: 26mm Tip: 19mm

Primary of several pencils that bear the Kerry name.

The P1035A Black Kerry is a match for the R1000 Excalibur Rolling Writer Pen. It was available with the matching R1000 in the Excalibur Gift Set RX1000 in the early-80's.

Intended by Pentel as "a pencil to be used as a fountain pen" the new 5 (now with a cap) was nicknamed Kelly by Japanese users, pronouncing "carry" the way Japanese speakers do when saying English words.

When Pentel decided to drop the 5 to replace it with the name users preferred, they went with the "Kerry" variant, thinking of the international market. [per u/First-Sail-1386 on Reddit]

Late-70's to early-80's pencils had the Date Code stamped on the lead reservoir in the yymmdd format. I do not know where the Date Code was moved when Pentel switched to the 2-character code.

## P1075 "Iris" Sharp Pencil

Image Source Jimmy Simpson

Size	0.5
Base Colors	A Black / B Red / C Blue / D Green / F Orange
Years Available	Mid to late-70's
Mfg Country	Japan
Dist Country	Japan
Price Tags	¥1000
Dimensions	Overall: 130mm Eraser Cap: 9.5mm Body: 86.5mm Grip: 19.2mm Tip: 14.8mm

Fortunately for us, this pencil contains the model number on the ring between the body and the grip, so we did not have to do any research to find out what it is. Unfortunately, the other pencil that looks very much like it, minus the color stripes did not have the model number. But the P1075 has ¥1000 price stickers on it, but some examples of the other pencil has a ¥800 sticker. This and a Yahoo Auction led us to believe for a while that that other pencils was a P875, but recently a late 1970's catalog page came to light with the model number P805 on it. That page also gave this pencil it's name of "Iris".

Pencils made after 1975 have the 6-digit date code stamped (yyymmdd format) on the lead reservoir. The above pencils are dated between 760709 and 780807.

## PC125 Rolly Mechanical Pencil

Image Source Jimmy Simpson

Size	0.5
Base Colors	Accents A Black / B Red / D Green Body (not necessarily Pentel code, but I am using 2 letter to differentiate) BB Red
Years Available	1984 to late-80's
Mfg Country	Japan
Dist Country	Japan
Price Tags	¥1500
Dimensions	Overall (retracted/extended): 136.8mm / 136.4mm Eraser Cap (retracted/extended): 9.1mm / 3.5mm Body: 106.5mm Tip (retracted/extended): 21.2mm / 26.4mm

The PC125 "appears to be" the Rolly version of the PC155 and possibly the PC165 Clicsharp.

The PC125 is a match for the RC12 Rolling Writer.

The model name starts with PC, followed by a three-digit number, and this number indicates the price, domestic/export and size in that order.

The price digit 1 = ¥1500, 2 = ¥2000 and 3 = ¥3000.

The domestic/export digit: 0-4 are for domestic (Japan) use and 5-9 are for export.

Dimensions	Overall: 141.4mm Eraser Cap: 11.3mm Body: 105.2mm Tip: 24.9mm

The PC255 is the Clicsharp version of the PC205 Rolly.

The PC255 is a match for the RC20 Clicroller. It was available with the matching color RC20 in the Slim Clicroller Gift Set (shown but not numbered). The RC20 was available labeled as a Rolly in Japan, or the Clicroller in the rest of the world.

The model name starts with PC, followed by a three-digit number, and this number indicates the price, domestic/export and size in that order.

The price digit 1 = ¥1500, 2 = ¥2000 and 3 = ¥3000.

The domestic/export digit: 0-4 are for domestic (Japan) use and 5-9 are for export.

## PC365 Clicsharp Pencil

Image Source Jimmy Simpson [1] | Pentel of America 1990 Catalog [2]

Size	0.5
Base Colors	AX Gold stripes on Black Matte / BX Gold stripes on Red Matte / CX Gold stripes on Blue Matte / EX Gold stripes on Brown Matte / WX Gold stripes on White Matte
Years Available	1985 to early-90's
Mfg Country	Japan
Dist Country	Worldwide
Dimensions	Overall (retracted/extended): 136.8mm / 136.4mm Eraser Cap (retracted/extended): 9.1mm / 3.5mm Body: 106.5mm Tip (retracted/extended): 21.2mm / 26.4mm

The PC365 is the Clicsharp version of the PC315 Rolly.

The PC365 is a match for the RC36 Clicroller. It was available with the matching RC366 in the Gift Set RCPxx (xx is matching color code).

In the 1990 US catalog, this was listed in the Excalibur section, although it does not appear to have any of the normal signs ("Excalibur" text, crown or sword) of being an Excalibur.

The model name starts with PC, followed by a three-digit number, and this number indicates the price, domestic/export and size in that order.

The price digit 1 = ¥1500, 2 = ¥2000 and 3 = ¥3000.

The domestic/export digit: 0-4 are for domestic (Japan) use and 5-9 are for export.

A side-knock type mechanical pencil with a built-in lead for the "Saprio" mechanical pencil that mainly encloses a scent that has the effect of supporting study. The shape is similar to Pianissimo.

The scent is trapped inside the core by a method called "nanocapsule manufacturing method", and by writing, the capsule is crushed and the scent component pops out, so that each scent seems to be more scented than the written line.

Other than that, body printing and clip printing have been changed / added.

## PD325 Quicker Clicker Junior Automatic Pencil

Image Source Knockologist

Size 0.5  
Base Colors A Black / B Red / V Purple  
Years Available Mid-90's to 1998  
Mfg Country Japan  
Dist Country Worldwide

This version of the Quicker Clicker came out in the mid to late 90's as an "economical version of America's #1 automatic pencil" (the PD345). The biggest difference is the pocket clip. Similar to how the PD335 came out in 1979 as an economical version of the 1977 PD345 by using a plastic pocket clip.

## PD335-T Quicker Clicker / Clic Transparent Automatic Pencil

Image Source Knockologist

Size	0.5
Base Colors	A Smoke / B Red / C Blue / D Green / G Yellow / V Violet / W White
Years Available	1979 to 1998
Mfg Country	Japan
Dist Country	Worldwide Clic - Japan Only
Price Tags	¥300 / ¥350
Dimensions	Overall: 144.0mm Eraser Cap: 14.1mm Clip Band: 9.6mm Body: 102.4mm Tip: 19.7mm

The PD335-T was marketed in Japan as the Clic and the rest of the world as the Quicker Clicker. In the Good Design Award, it was known as the Jet Click.

Also released as a Pop'npop version.

Winner of the 1980 Good Design Award and the 1996 Good Design Long Life Award.

## PD345 / PD347 / PD349 (Version 1) Quicker Clicker / Clic Automatic Pencil

Image Source <https://www.ebay.com/itm/321587345114> (andrey543)

Size	0.5 / 0.7 / 0.9
Base Colors	0.5 A Black / C Blue / D Green / F Orange / G Yellow 0.7 C Midnight Blue / K Light Green / Q Turquoise / S Sky Blue 0.9 B Red / E Dark Brown / G Cream (Ivory)
Years Available	0.5 1977 to 1998 0.7/0.9 1982 to 1998
Mfg Country	Japan
Dist Country	Worldwide Clic - Japan Only
Dimensions	Overall: 144.2mm Eraser Cap: 14.1mm Clip Band: 9.7mm Body: 101.3mm Tip: 19.1mm

The PD345/PD347/PD349 was marketed in Japan as the Clic and the rest of the world as the Quicker Clicker.

In 1999, Pentel changed the design of the PD340 series to add a large rubber grip and merged the PD340T series into the main line, treating the Transparent aspect as a part of the color code.

The Date Code is under the clip.

## PD345 / PD347 / PD349 (Version 2) Quicker Clicker / Clic Automatic Pencil

Image Source Pentel of America 2000 Catalog [1-3] | Pentel International 2013-2014 Catalogue [4,5]

Size	0.5 / 0.7 / 0.9
Base Colors	0.5 A Black / C Blue / TA Transparent Smoke / TB Transparent Red / TC Transparent Blue / TD Transparent Green 0.7 C Blue / TA Transparent Black / TC Transparent Blue / TV Transparent Violet 0.9 B Red / TA Transparent Black / TB Transparent Red
Years Available	1999 to Current
Mfg Country	Japan
Dist Country	Worldwide Clic - Japan Only
Dimensions	Overall: 146.5mm Eraser Cap: 14.1mm Clip Band: 9.7mm Body: 100.9mm Tip: 21.8mm

The PD345/PD347/PD349 was marketed in Japan as the Clic and the rest of the world as the Quicker Clicker. It was also referred to as the PD345RG / PD347RG / PD349RG in some catalogs.

In 1999, Pentel changed the design of the PD340 series to add a large rubber grip and merged the PD340T series into the main line, treating the Transparent aspect as a part of the color code. Initially, the rubber grip was smooth, but about 2011, Pentel redesigned the grip in a wavy "fingerprint" pattern.

## PD1065 Sharp Technica II Pencil

Image Source Knockologist [1] | Jimmy Simpson [2] | <https://shogei-bungu.com/?pid=24317169> [3]

Size	0.5
Base Colors	A Black / B Red / F Orange
Years Available	1974 to 1980
Mfg Country	Japan
Dist Country	Worldwide
Price Tags	¥1000
Dimensions	Overall: 143.0mm Reservoir Cap: 13.3mm Body: 111.8mm Tip: 17.9mm

I am not sure of the significance of the tan colored 0.5mm Triangle Sticker. This pencil is the only place I have seen this color sticker; all other triangular 0.5mm stickers are red.

We don't know much about the red PD1065, with the red cap. At first we assumed that it was an early version that was discontinued, but the fact that I have seen it with both the small triangular sticker (pre-'76), and the larger JIS triangular sticker ('76 and later) may just mean that it was just a rarer version.

Size 0.5 / 0.7 / 0.9 / 1.1  
Base Colors A Black / B Burgandy / C Blue / D Green / E Brown / G Yellow  
Years Available 1967 to 1970  
Mfg Country Japan  
Dist Country Japan  
Price Tags ¥300  
Dimensions Overall: 145.2mm / 143.5mm  
Eraser Cap: 11.3mm  
Body: 114.1mm  
Tip: 19.8mm / 18.1mm

### Texts reads:

PENTEL ELEVEN 11 MADE IN JAPAN B2  
PENTEL ELEVEN 11 MADE IN JAPAN B2  
PENTEL ELEVEN 11 MADE IN JAPAN B5  
PENTEL ELEVEN 11 MADE IN JAPAN B1  
PENTEL ELEVEN 11 MADE IN JAPAN B7

The B1, B2, B5 & B7 are probably Mold Marks.

The Sharp 11 pencil came in multiple sizes, and over the course of it's production, the tip size also changed from a 2mm sleeve to a 4mm sleeve, as you can see between the black, brown & red vs the blue & yellow. Also, you can see the change in the design of the clip between those same images.

Thanks to Reddit user u/Money-Mechanic, who purchased a Sharp 5 CPA pencil in the box, it appears that the Sharp 5 CPA is an early version of the Pentel 11.

## Pentel 11 (S305 / S307 / S309) Pencil (Version 2)

Image Source Jimmy Simpson [1,2] | <https://jp.mercari.com/item/m32790198375> [3]

Size 0.5 / 0.7 / 0.9  
Base Colors A Black / B Burgandy  
Years Available 1971 to early-70's  
Mfg Country Japan  
Dist Country Japan  
Price Tags ¥300  
Dimensions Overall: 145.2mm  
Eraser Cap: 11.3mm  
Body: 114.1mm  
Tip: 19.8mm

Texts reads:

PENTEL 0.5m/m S305 JAPAN B2

PENTEL 0.5m/m S305 JAPAN B4

The B2 & B4 are probably a Mold Mark.

The Japanese text on the left side of the box translates to "Pentel Sharp".

In 1971, Pentel officially changed their name to Pentel Co. Ltd, and about that time, they redesigned their logo. When they did this, they changed the Sharp 11 to this new version with the new logo and adding the model numbers to the pencil.

## PF335 / PF337 / PF339 Film Lead Pencils

Image Source Jimmy Simpson

Size	0.5 / 0.7 / 0.9
Base Colors	All Creme Bodies 0.5 Brown/Red text 0.7 Blue text 0.9 Yellow text
Years Available	Mid-70's to late-90's
Mfg Country	Japan
Dist Country	Worldwide
Dimensions	Overall: 143.7mm Eraser Cap: 11.4mm Body: 112.0mm Tip: 20.3mm

The PF335 & PF337 have sliding sleeve tips. The PF339 has a fixed tip.

This series of pencils was designed for Drafting Mylar or Polyester film, to go over a document, so you can "write" on it without destroying or damaging the original.

Due to the type of lead being used, it was probably too expensive to manufacture the special eraser for the pencils, so Pentel just used a rubber stopper. There was a ZF11 block eraser for use with this lead.

Date Codes may be either stamped (70's-early 80's) on the lead reservoir in yymmdd format or (80's & later) stamped or printed under the band of the clip, in line with the printed text.

Dimensions	Overall: 147.6mm Reservoir Cap: 7.1mm Extender: 17.9mm Ring: 8.2mm Body: 94.2mm Tip: 20.2mm

I am not completely sure of what the difference in the ring was. I know on the PMG, one was sold in Japan, and the other in the rest of the world. Here, I am not so clear on, as the yellow ring appears in the US 79, 80 & 82 catalogs, then the silver ring in the 84 & 85, before switching back to yellow for all subsequent catalogs.

I have included the breakdown of the PG5 to give a comparison to it's precursor, the Graph II [See the article "Graph II vs PG5" in Appendix B].

## PMG (Pentel Mechanica Graph) Graph Pencil

Image Source Jimmy Simpson

Size	0.3
Base Colors	Red Band (Japan) / Gold Band (US & Europe)
Years Available	1970 to early-00's
Mfg Country	Japan
Dist Country	Worldwide
Price Tags	Early ¥1000, Later ¥1300
Dimensions	Overall [Capped / Posted]: 147.5mm / 146.9mm Reservoir Cap: 7.7mm Extender: 17.9mm Ring: 8.5mm Body: 94.0mm Tip: 19.4mm Tip Cap: 20.22mm

Designed as a low-cost version of the flagship Pentel Mechanica MEC and based off the Pentel Graph body, the PMG (Pentel Mechanica Graph) was released in 1970. As occasionally happens among many Pentel pencils, there is a different design for the different markets, with the Japanese market having a red band around the lead indicator and the overseas market having a gold ring. Of all of the Graph designs, it is the only one that has a tip protector, whose design is also similar to the P515 Sharp L.

Recently I received an early version of the PMG, probably the first release. It is designed very similarly to the Graph II, in that the lead type indicator and ring go onto a connector molded into the body (top view), where the later versions, that connector is a separate piece (bottom view). Due to this molded connector, the lead reservoir will not fit in from the rear, so the reservoir has a 5mm thread that screws into the front of the body, where on the newer versions, it drops in from the rear.

## PN305 QX Pencil

Image Source <http://mechanicalpencilmuseum.blogspot.com/2013/05/pentel-qx-pn305.html>

Size	0.5
Base Colors	Black
Years Available	1990 to early-00's
Mfg Country	Japan
Dist Country	Japan
Price Tags	¥3000

The QX is labelled on the box as “Push and Write” and not as an automatic. They did this intentionally to distinguish the QX’s mechanism from other automatics of the time.

All these automatics have one important drawback (which is what puts most people off): The lead sleeve needs to touch the paper and retract for lead to extend. This results in a scratchy feel and lighter pencil strokes.

Here’s how the QX works: When you push the tip against the paper (even with the lead extended), it will retract a little (kind of like a lead cushioning system, but not as soft) and when it springs back it will extend the lead further. The important thing to note here is that the entire tip including the lead and lead sleeve retracts. So you can “knock” the pencil at any point and ideally before the sleeve touches the paper. It took me a few paragraphs of writing to get used to this, but you keep getting lead fed without the sleeve ever touching the paper. I know this sounds weird but I started subconsciously “knocking” the pencil by pushing a little harder at every period pretty quickly. This eliminates the drawback of other automatics. There is no other pencil that does this.

## PS35 Sliding Sleeve Automatic Pencil

Image Source Jimmy Simpson

Size	0.5
Base Colors	Silver
Years Available	Late-70's to late-90's
Mfg Country	Japan
Dist Country	Worldwide
Dimensions	Overall: 135.5mm Eraser Cap: 11.5mm Body: 110.3mm Tip: 13.7mm

The PS35 is a match for the R3 Rolling Writer Pen. It was available with the matching R3 in the Roller Pen Set PRS-3. The P575 Crew, the P595 Pop'npop, the Rush on Goal and the PS35/PS45/PS65 all have similar form factors. The PS35-65 models manufactured around 1978 to 1985, continue with the extended lip tip into the body recess. The original pencils used the aluminum lead reservoir and had the a narrow opening at the cap end. Around 1981-1982, manufacturing switched to a plastic lead reservoir and the cap end opening was expanded to accommodate this. The Date Code is stamped on the lead reservoir in yymmdd format. Known Date Codes on aluminum lead reservoirs are between 781023 to 810127, and on plastic lead reservoirs, between 811126 to 840329.

The PS35-65 models manufactured around 1978 to 1985, continue with the extended lip tip into the body recess. The original pencils used the aluminum lead reservoir and had the a narrow opening at the cap end. Around 1981-1982, manufacturing switched to a plastic lead reservoir and the cap end opening was expanded to accommodate this. The Date Code is stamped on the lead reservoir in yymmdd format. Known Date Codes on aluminum lead reservoirs are between 800904 to 811015, and on plastic lead reservoirs, between 820112 to 841011.

## PS315 Sharp for Pros with Sliding Sleeve

Image Source Jimmy Simpson

Size	0.5
Base Colors	N Gray / C Blue
Years Available	Mid-70's to early-10's
Mfg Country	Japan
Dist Country	Worldwide
Dimensions	Overall: 143.6mm Eraser Cap: 11.3mm Body: 112.0mm Tip: 20.3mm

Originally released in Gray with a short text in the mid-70's, Pentel switched to a Blue body with the same text in the next generation, then quickly switched to the standard P200 style text with the m/m size. In the next generation, Pentel dropped the slash in the mm and finally in the last version, the Blue plastic used for the body got slightly darker. Date Codes may be either stamped (70's-early 80's) on the lead reservoir in yymmdd format or (80's & later) stamped or printed under the band of the clip, in line with the printed text.

## PS513 Sharp Sliding Sleeve Pencil

Image Source Jimmy Simpson

Size	0.3
Base Colors	Silver with Black / Red Grip
Years Available	1970 to mid-80's
Mfg Country	Japan
Dist Country	Worldwide
Dimensions	Overall: 129mm Eraser Cap: 9.5mm Body: 71mm Grip: 34mm Tip: 14.5mm

It wasn't until I received the bottom pencil in the image above that I realized that the old pencil (3 over Pentel) used the old-style font, which means that it (as well as the ML3†) was probably released in 1970, before the new logo was released. The bottom pencil (Pentel over 3), was probably a mid to late-70's revision when the old stock was depleted. I knew about the bottom design from the US catalogs from that era.

# Pentel Pencils Identification Book

## PS523 Sharp for Pros with Sliding Sleeve

Image Source Jimmy Simpson

Size	0.3
Base Colors	D Olive Green
Years Available	Late-70's to late-90's
Mfg Country	Japan
Dist Country	Worldwide
Dimensions	Overall: 143.6mm Eraser Cap: 11.3mm Body: 112.0mm Tip: 20.3mm

The PS designation for this pencil refers to the Sliding Sleeve tip. This pencil was first released in the late-70's with a shorter text on the side. This was quickly switched to what is the standard text for P200 style pencils with the m/m size. The final generation of this pencil dropped the slash from the mm, along with some other minor changes.

Date Codes may be either stamped (70's-early 80's) on the lead reservoir in yymmdd format or (80's & later) stamped or printed under the band of the clip, in line with the printed text.

## PS535 Sharp Sliding Sleeve Pencil

Image Source Jimmy Simpson

Size	0.5
Base Colors	Black
Years Available	1970 to early-10's
Mfg Country	Japan
Dist Country	Worldwide
Dimensions	Overall: 141mm Eraser Cap: 11mm Body: 68mm Grip: 44mm Tip: 18mm

This pencil has the same ridged grip as the S50 series. The most distinctive thing about this pencil is the black body with the silver ring at the bottom that is notched out for the name Pentel. It is related to the BS5 Black Sharp 5 pencil (same pencil with a fixed tip).

## PS1042 / PS1045 Sliding Sleeve Automatic Pencil

Image Source Jimmy Simpson

Size	0.2 / 0.5
Base Colors	Silver
Years Available	1973 to 1980
Mfg Country	Japan
Dist Country	Worldwide
Price Tags	PS1042 - ¥1200 PS1045 - early ¥1000, late ¥1200
Dimensions	Overall: 132.6mm Eraser Cap: 7.2mm Body: 80.2mm Grip: 30.3mm Tip: 14.9mm

PS1045 is listed only in the Japanese catalog.

There was a related silver-plated ballpoint, the BK1040 (?).

## PSD5 Double-Knock Drafting Pencil

Image Source Jimmy Simpson [1,2] | Pentel of America 1980 Catalog [3]

Size	0.5
Base Colors	Black
Years Available	Early to Mid-80's
Mfg Country	Japan
Dist Country	Worldwide
Dimensions	Overall [Retracted]: 136.8mm Cap Eraser: 13.6mm Body: 64.2mm Ring: 7.8mm Grip & Tip: 51.2mm

This pencil was sold everywhere in the world as the PSD5, except in Japan, where it was marketed as the PWP15. As far as I know, the only difference between the two, is the Lead Indicator Ring. On the front of the PSD5 ring, above the indicator window, it says Pentel. Rotating clockwise (looking from the eraser), it says 0.5, and on the back it has PSD5 above Japan.

The only version of this pencil I have seen is the silver metal grip, but when it was introduced in the 1980 Pentel of America catalog, the grip was shown in black.

Price Tags	¥2000
Dimensions	Overall: 132mm Eraser Cap: 8.5mm Body: 63mm Grip & Ring: 48.5mm Tip: 12mm

The PX21 is a match for the RX21 Excalibur pen. It was available with the matching RX21 in the Excalibur gift set, PRX21. The PX21 pencil (sold only in Japan) is the 0.5mm version of the PX7-21 (0.7mm).

This pencil was unknown by me, until I identified a PRX21 set. Both the PX20 and the PX22 are the pencils in the PRX20 and the PRX22 set, so the pencil of the PRX21 would be the PX21. This also makes sense of the PX7-21 pencil - that being the 0.7mm version of the 0.5mm, PX21.

## Q45 Charisma Automatic Pencil

Image Source Jimmy Simpson [1] | Pentel of America 1990 Catalog [2,3]

Size	0.5
Base Colors	A Black / B Red / C Blue
Years Available	1981 to late-90's
Mfg Country	Japan
Dist Country	Worldwide
Dimensions	Overall: 134.7mm Eraser Cap: 9.0mm Body: 105.6mm Tip: 20.1mm

The Q45 is a match for the RSH4 Super Ball pen. It was available with the matching RSH4 in the Super Ball Metal Tip Set QRSH-4x (x is matching color code).

Since the other two pencils in this series are the Q525 and the Q565, why is this one called the Q45. It had to be that the Q545 Sharplet 500 already existed.

The Date Code on this series of pencils is right at the transition point from the yymmdd format to the 2-character format.

# Pentel Pencils Identification Book

# Pentel Pencils Identification Book

## Q535 Kerry Mechanical Pencil

Image Source Jimmy Simpson

Size	0.5
Base Colors	B Red / C Blue / D Green / G Yellow
Years Available	1980 to mid-80's
Mfg Country	Japan
Dist Country	Worldwide
Price Tags	¥500
Dimensions	Overall [Capped / Posted / No Cap]: 124.7mm / 133.3mm / 108.2mm Cap [Capped / Posted]: 55.7mm / 59.8mm Reservoir Cap: 4.9mm Body: 89.8mm Tip: 17.5mm

This pencil was released as a low end Kerry pencil (along with the P1035 & P1135). I am not sure exactly when these were released, but based on the price stickers on these pencils, these were probably at least the mid-80's, since these are the second version of the square stickers (missing the JIS info).

Years Available	1985 to early-90's
Mfg Country	Japan
Dist Country	Worldwide
Price Tags	¥500
Dimensions	Overall: 135.1mm Eraser Cap: 12.3mm Body: 74.2mm Grip: 29.6mm Tip: 19mm

This pencil is of unknown vintage, so I had to look at other pencils to determine the years of availability. The Q(5)x5 series (Q45, Q525, Q565) pencils I own have a date code printed and/or stamped into the lead reservoir. The earliest is 880617 (June 17, 1988) and the last is 1J (new format, October 1991). Why would they number the Q45 as that instead of Q545? It had to be that the Q545 model was already in existence, or planned, so this pushes the date back to the late-80's.

## Q565 Charisma Automatic Pencil

Image Source Jimmy Simpson

Size	0.5
Base Colors	Gold
Years Available	1981 to late-90's
Mfg Country	Japan
Dist Country	Worldwide
Dimensions	Overall: 134.7mm Eraser Cap: 9.0mm Body: 105.6mm Tip: 20.1mm

The Q565 is a match for the RSH6 Super Ball pen. It was available with the matching RSH6 in the Super Ball Metal Tip Set QRSH-6.

The Date Code on this series of pencils is right at the transition point from the yymmdd format to the 2-character format.

## Q565WO 1984 Olympics Automatic Pencil

Image Source Jimmy Simpson

Size	0.5
Base Colors	Gold
Years Available	1984
Mfg Country	Japan
Dist Country	USA
Dimensions	Overall: 134.7mm Eraser Cap: 9.0mm Body: 105.6mm Tip: 20.1mm

The Q565 is a match for the RSH6WO Super Ball pen. It was available with the matching RSH6WO in the Super Ball Metal Tip Set QRSH-6WO.

This pencil & pen set was far less common than the EX20WO (see PX7-21WO) set. I see dozens of the EX20WO sets on auction sites all the time, but have only ever seen 2 of these sets at all.

Years Available	0.5 / 0.7 / 0.9 - 1986 to Current 0.3 - 1988 to Current
Mfg Country	Japan
Dist Country	Worldwide
Dimensions	Overall: 138.6mm Eraser Cap: 15.1mm Body: 56.1mm Ring: 7.0mm Grip/Tip: 60.4mm

The Q1005 pencils was a match to the B1007 Ballpoint Pens, winner of the 1989 Good Design Award. (<https://www.g-mark.org/gallery/winners/9cb3fe68-803d-11ed-862b-0242ac130002>)

In the early 2000's, the Smash was almost discontinued due to slow sales, but picked up sales and now is one of the most popular limited edition pencils released since the early 2010's.

Winner of the 1987 Good Design Gold Award (for the Q1005, Q1007 & Q1009).

Winner of the 1989 Good Design Award (for the Q1003).

Winner of the 2000 Good Design Long Life Design Award (for the Q1005, Q1007 & Q1009).

Winner of the 2000 Good Design Long Life Design Award (for the Q1003).

## QD5 Quick Dock Mechanical Pencil

Image Source <http://afterschool-stationery.blog.jp/archives/2261474.html> [1] | Jimmy Simpson [2-6]

Size	0.5
Base Colors	K Lime Green / P Pink / S Sky Blue / V Violet Cartridges - Blue, Pink, Yellow
Years Available	2007 to early-10's
Mfg Country	Japan
Dist Country	Japan
Price Tags	¥450
Dimensions	Overall (retracted / extended): 137.4mm / 140.4mm Eraser Cover: 9.7mm Body: 73.5mm Grip: 39.1mm Tip (retracted / extended): 15.1mm / 18.1mm

The "Quick Dock" to be released this time is a mechanical pencil born from a completely new idea of attaching a replacement core cassette to the main body as it is and using it.

By exchanging and attaching a replacement core cassette of three colors to the transparent body, you can enjoy three types of color variations with one shaft. Also, since the replacement core cassette is attached to the main body as it is, your hands will not get dirty and you can quickly replenish the replacement core.

There are a total of 12 combinations of 4 main body shaft colors and 3 replacement core cassettes.

Winner of the 2008 Good Design Award

## Rush On Goal Pencil

Image Source Jimmy Simpson

Size 0.5

Base Colors The Color Codes are my (Jimmy Simpson) designation. There is nothing official about these.  
Type A - Rush On Goal printed diagonally = CZ Silver on Blue / ZZ Silver on Frosted Silver  
Type B - 4-point star on each side = AB Red-Black / AC Blue-Black / ZB Red-Silver / ZC Blue-Silver  
Type C - Field of Stars (ROG on front) = BX Gold on Red / CX Gold on Blue  
Type D - Three Stripes winding from side to front to side = AD Green on Black / CX Gold on Blue  
Type E - Field of Stars (ROG on side) = ZC Blue on Silver / ZF Orange on Silver

Years Available Late-70's to early-80's

Mfg Country Japan

Dist Country Japan

Price Tags ¥500

Dimensions Overall: 137.3mm  
Eraser Cap: 10.9mm  
Body: 110.3mm  
Tip: 16.1mm

Says "Rush On Goal" somewhere on the pencil, depending on design. AFAIK, no model number printed on the pencil. Since it was manufactured at the same time as the P595 Pop'npop, I suspect this may be model P595 (non-Pop'npop version).

The Date Code is stamped on the lead reservoir in yymmdd format. Known Date Codes for Color Codes Type A & Type B are between 790327 to 790918. The known Type D codes are 810127 & 810129. Type C & E are unknown. These pencils have an aluminum reservoir.

## S-15 Pencil

Image Source <https://bit.ly/Pencils11-S15> (Germ / Pencils11) [1] | <https://www.flickr.com/photos/28971598@N08/2890345979> (Germ / Pencils11) [3]

Size	0.5
Base Colors	A Black / D Green / T Clear
Years Available	Early to mid-70's
Mfg Country	Japan
Dist Country	Japan
Dimensions	Overall: 136mm Reservoir Cap: 7.8mm Extender: 24mm Body: 86.4mm Tip: 17.8mm

I just recently received an all Black Sharp 9 (S-19), that can be seen at the bottom of the image for that pencil. When I first encountered the item at the top of this image, I saw it and assumed that it was the same pencil, until I noticed 2 things about it. At the bottom of the image is part of the box of these pencils, and it says S-15. Then I noticed the lead sleeve on the tip. The Sharp 9 pencils do not have a lead sleeve, they just feed right out of the tip.

# Pentel Pencils Identification Book

## S55 / S57 / S59 Sharp "Deluxe" Pencil

Image Source Jimmy Simpson

Size 0.5 / 0.7 / 0.9  
Base Colors Grips may be of various colors on early models  
0.5 Silver  
0.7 Silver / Blue  
0.9 Silver / Gold

Years Available Late-60's to early-10's

Mfg Country Japan

Dist Country Worldwide

Price Tags Early ¥500, Late ¥700

Dimensions Overall: 141mm  
Eraser Cap: 11mm  
Body: 68mm  
Grip: 44mm  
Tip: 18mm

The S55/S57/S59 Deluxe Pencil has a ridged grip with a metal body. The ridges on the early 1970's pencils were much deeper than on later versions, and some early versions had eraser caps with the size stamped on the end. The body has not changed much over time, other than the size, stamped into or printed on the body, with the earliest pencils being stamped with "5", even when they are 0.7 & 0.9mm (see set of maroon pencils above). The inner lead reservoir started out with as metal but in the late-70's started being made in plastic.

Original shipping boxes showed the model number to be S-55, with later ones showing S55.

Image Source Cummins07 [1] | Jimmy Simpson [2]

Size	0.5
Base Colors	Gold Plated
Years Available	Early-70's
Mfg Country	Japan
Dist Country	Japan
Price Tags	¥5000
Dimensions	Overall: 138.6mm Eraser Cap: 8.1mm Body: 70.2mm Grip: 42.1mm Tip: 18.2mm

Plated in 23-karat 10-micron gold. This pencil has a unique style tip that looks like a standard Pentel tip, but instead of a thin sleeve, it has an additional portion of wider tip.

Band around middle reads: Pentel SCEPTER Japan 10 $\mu$  G.P.

Tags #FF-Scepter #Gold

# Pentel Pencils Identification Book

## Scepter Silver Plated Pencil

Image Source Jimmy Simpson

Size	0.5
Base Colors	Silver Plated
Years Available	Early-70's
Mfg Country	Japan
Dist Country	Japan
Price Tags	¥3000
Dimensions	Overall: 138.6mm Eraser Cap: 8.1mm Body: 70.2mm Grip: 42.1mm Tip: 18.2mm

Plated in 20-micron silver.

The first generation of this pencil had the unique style tip that the other two Scepters had: a tip that looks like a standard Pentel tip, but instead of a thin sleeve, it has an additional portion of wider tip. Also notice the difference in the text on the clips, with the first generation being the old type-face font running top to bottom, and the second generation with the new logo and JAPAN running sideways. They also had an unusual eraser band. Second generation pencils appear to use a P205 style 2mm tip, and a standard eraser.

## Scepter Sterling Silver Pencil

Image Source Cummins07 [1] | Jimmy Simpson [2]

Size	0.5
Base Colors	Sterling Silver
Years Available	Early-70's
Mfg Country	Japan
Dist Country	Japan
Price Tags	¥7000
Dimensions	Overall: 138.6mm Eraser Cap: 8.1mm Body: 70.2mm Grip: 42.1mm Tip: 18.2mm

Sterling Silver body and grip. The first generation has a unique style tip that looks like a standard Pentel tip, but instead of a thin sleeve, it has an additional portion of wider tip. It also had an unusual eraser band. Later generations have a standard silver colored 2mm tip and a standard eraser band.

Band around middle reads: Pentel SCEPTER Japan: Sterling Silver

## SG Sharp Gold Pencil

Image Source Jimmy Simpson [1] | 1970 Japanese One-Sheet [2]

Size	0.5
Base Colors	Matt Black with Gold Trim
Years Available	1970
Mfg Country	Japan
Dist Country	Japan
Price Tags	¥1000
Dimensions	Overall: 138.9mm Eraser Cap: 11.1mm Body: 69.8mm Grip & Ring: 46.2mm Tip: 11.8mm

Like the early SV (SG33), the SG does not have any marking below the clip to indicate size or a crown indicating an Excalibur. The only markings on it are "Japan" opposite where the crown would be, and Pentel (old typeface) plus the stylized P on the clip. A few of major differences between this SG and later SG# pencils is that this one is about 7mm longer, and (aside from the SG7 version 1) it has a different style cap and the tip is a smooth curve all the way to the lead exit, instead of having a different pipe inserted.

According to the original box, this Sharp is model SG and listed as Gold, which is the way these were described in the 1970 Japanese One-Sheet. This also makes sense of where the SG name came from: Sharp Gold. This also makes sense of the rest of the SG series (minus the SV silver pencils) taking their name from being Gold/Gold accented pencils. Another definitive indicator of the timeframe this came out, is on the case of a dozen of these packaged pencils, it has "Visit the Pentel EXPO70 3-PO-16". I am not sure what the 3-PO-16 means (possibly their booth location), but telling you to visit EXPO70, along with being one of the pencils in the 1970 Japanese One-Sheet, pretty much says this one came out in early 1970.

## SG7 (Version 1) Early Excalibur Pencil

Image Source Jimmy Simpson

Size	0.7
Base Colors	Matt Black with Gold Trim
Years Available	1970-71
Mfg Country	Japan
Dist Country	USA
Dimensions	Overall: 133mm Eraser Cap: 9.5mm Body: 63mm Grip & Ring: 48.5mm Tip: 12mm

I discovered this pencil on the Wayback Machine for Germ's Pencils11 blog. He had a picture of all of his Excalibur and SG pencils, and there were a number of them that I had not seen before.

This pencil looks like an SG15 and has that matt finish, but if you look closely at the text above the ring, it says Pentel (newer font) and has the Excalibur crown above that (this Crown is outline format vs the P1005/P1007 line drawing format), as well as the Pentel (old-style font) down the clip with the stylized P at the top. Like the SG, it also has the smooth eraser cap and the smooth curved tip.

What I believe happened is that Pentel Japan released the SG pencil (as shown in their 1970 Japanese One-Sheet catalog), and Pentel of America wanted to release it as well, so it was released as the SG7 (being a 0.7mm vs the SG 0.5mm) as one of the first Excaliburs (along with the P1005/P1007). Probably in the mid to late-70s, Pentel Japan released the PX22 Gloss Black Excalibur, Pentel of America picked to go with it and replaced the SG7 with the Glossy version.

I have not seen this mentioned anywhere, but I suspect that there is an SG5 that was released in Japan at the same time as this one. All other Excalibur Crown pencils were released in Japan as 0.5mm & in the US as 0.7mm, so this makes sense.

This was previously cataloged as Unknown Model 08, and the SG7 designation has been confirmed by a 1973 Excalibur Brochure.

## SG7 (Version 2)† "Excalibur" Pencil

† (Tentative Designation)

Image Source Jimmy Simpson

Size	0.7
Base Colors	Matt Black with Gold Trim
Years Available	1972-1973
Mfg Country	Japan
Dist Country	USA
Dimensions	Overall: 132mm Eraser Cap: 8.5mm Body: 63mm Grip & Ring: 48.5mm Tip: 12mm

I first saw the SG7 Version 2 pencil on the Wayback Machine for Germ's Pencils11 blog. He had a picture of all of his Excalibur and SG pencils, and there were a number of them that I had not seen before.

I finally acquired this SG7 pencil in a set with a similarly colored Excalibur pen (that I tentatively identify as an early RG10). Both of these are monogrammed with "The Mitsui Bank of California", which opened in 1972. My guess is that this was a gift set when they opened at that time, therefore placing this in the very early days of the Excalibur series. I believe this was an early Excalibur, probably a stop-gap after the run of the first Black Excalibur, the SG7 (Version 1), had sold out, but before the new glossy SG7 was released, and is thus a very limited release.

In earlier books, I had this SG7 entered as Unknown Model 09.

# Pentel Pencils Identification Book

## SG7 (Version 3) Excalibur Pencil

Image Source Jimmy Simpson

Size	0.7
Base Colors	Gloss Black with Gold Accents
Years Available	Mid-70's to Late-80's
Mfg Country	Japan
Dist Country	Worldwide
Dimensions	Overall: 132mm Eraser Cap: 8.5mm Body: 63mm Grip & Ring: 48.5mm Tip: 12mm

This is the third Excalibur to use the model number SG7, and is a change to the design, going from a matt finish, to this new glossy black finish with the printed on Crown over Excalibur logo.  
The SG7 is a match for the RG10 Excalibur Pen. It was available with the matching RG10 in the Excalibur gift set, EX-17.  
The SG7 is the 0.7mm version of the PX22 (0.5mm) that was only available in Japan.

## SV / SV5 Sharp Silver Pencil

Image Source Jimmy Simpson

Size	0.3 / 0.5
Base Colors	SV Brushed Silver SV5 Brushed Silver / A Black / C Blue / D Green / E Brown
Years Available	Silver 1970 to mid-80's Colors Mid-70's to 1978
Mfg Country	Japan
Dist Country	Japan
Price Tags	SV Early ¥1000, Later ¥1200 SV5 ¥1000
Dimensions	Overall: 132mm Eraser Cap: 8.5mm Body: 63mm Grip & Ring: 48.5mm Tip: 12mm

The top pencil in the picture above is, I believe, the pencil from the 1970 Japanese One-Sheet catalog, and is thus the original SV, as like the SG, it has no text below the clip, the early clip with the old-style Pentel and the stylized "P", and the early eraser cap. The internals are also very different in that the lead reservoir screws into the front of the grip with larger diameter threads (5 mm) than those that screw the tip on (4 mm).

In the mid to late-70's, Pentel released the colors under the SV5 series with the color code (I am not absolutely positive about the A color, since it is truly a dark blue).

These pencils are commonly referred to as the SG33 / SG35 / SG45, but were cataloged and distributed as the SV / SV5. I believe that the common model numbers came from the fact that the SG (Sharp Gold) line became the SG15, SG65 & SG75, and someone decided that the SV (Sharp Silver) line were the SG33/5 and SG45, like the PS35/45/65 models.

# **Appendix A - Branded Pentels**

# Pentel Pencils Identification Book

## Branded Pentels

When I first started putting this book together, I decided that I did not want to have limited edition or special pencils in here, other than the Pop'npop and eventually, the Olympics pencils. I wanted to just keep base models in this. I then realized that a lot of the special pencils had unique numbers and started by adding the DP325 pencil (at that time I had it cataloged as a P565) in catalog v2000.03.

With catalog v2022.02, I started adding other Disney pencils I found. With version v2022.05, I created the Retailer (now Branded) Pentels section of the book and moved the Disney pencils (I renumbered the P565 to DP325 at this time) to that section, along with adding several other brands, including Burberry and Person's Collection.

Most of these pencils were unique in style and color, but there was one that was just store exclusive pencils with limited edition colors, and another that had a standard color Kerry with a unique center ring.

Another retailer had what looked to me to be just a P205 purchased through the Pentel Imprint Division with their name stamped on it.

There are other stores that carry exclusives on limited edition colors, but I did not know what all stores and what were exclusive to them.

So, as of v2022.11 of this book, I decided to drop stores that don't have unique styling of pencils, so I have dropped Loft which carried limited edition colors of P205, PG1005 and Q1005 Smash pencils. I also dropped Freitag because it looks to just be the imprinted P205.

I am keeping Delfonics, Graniph and Muji because although they are pretty much standard pencils in the P200 and PG510 range, they are printed with their own unique style, or in the case of Muji, no printing at all. I am still up in the air about Delfonics, but if I pull the Graniph out of Retailers, it will move to the front of the book since it is a co-brand between Pentel Stein and Graniph, with its own unique model number.

All the other brands either have unique styles that may or may not be based on standard Pentel pencils, or they have very unique printing based on their properties.

Size	0.5
Base Colors	A Black / B Red / C Navy
Years Available	1985 to 1990's
Mfg Country	Japan
Dist Country	Worldwide
Price Tags	¥10000
Dimensions	Overall: 133.6mm Body: 55.3mm Grip: 55.7mm Tip: 22.6mm

These pencils were a collaboration between Pentel and Burberry, a specialized clothing brand.

In 1999, Burberrys changed their name to Burberry. As far as I can tell, this pencil was produced with only the early logo.

Apparently, this pencil also changed from a lead sleeve-less to having a lead sleeve (or vice-versa) at some point. Originally, designated Disney Sharp, since that is all it was called in the Japanese 1970 One-Sheet catalog. In April 2022, an auction came up with a packaged Snow White version that said it is a model D109, which makes sense, since there was a very similar looking S-105 pencil shown in there as well.

## Disney DP325† Character Automatic Pencil

† (Tentative Designation)

Image Source Jimmy Simpson

Size 0.5  
Base Colors Clear transparent body with colored lead reservoir  
Red / Pink / Orange / Yellow / Green / Blue  
Years Available 1977  
Mfg Country Japan  
Dist Country Japan  
Price Tags ¥500  
Dimensions Overall: 141.2mm  
Eraser Cap: 11.0mm  
Body: 112.0mm  
Tip: 18.2mm

In addition to the 6 color lead reservoirs, these pencils had 6 different character stickers that were stuck to the lead reservoirs.

Large Mickey Mouse  
Mickey Mouse running with letter  
Large Minnie Mouse  
Minnie Mouse waving  
Donald Duck  
Goofy

I have never found an official model number for this pencil, but I found pictures of the P565 Popeye pencils in the tray with the model number P565ST2 (truncated to P565) on it, so I took this number as a Pentel character pencil. At that time I only collected P200 type pencils, so I did not look at the whole Pentel numbering system to see how they numbered Disney pencils. Since this pencil came out before the Popeye pencil, I am basing it on the Japanese version of the P205, the P325 and using DP325 as the model for this pencil.

These pencils have one of the earliest versions, that I have found, of the 2-character Date Code that was printed on the character sticker that wrapped around the lead reservoir. All known Date Codes are between 6L and 7F, which should be December, 1976 to June, 1977.

Base Colors Yellow/Purple  
Years Available 1991  
Mfg Country Japan  
Dist Country Japan

These pencils were a collaboration between Pentel and Person's, a specialized clothing brand.

I have not seen this pencil before. There is also a Person's Collection PQ8 with a flag body that was released in 1992. This pencil is date stamped 1A, leading me to believe it was made in January 1991. Since I see the flag body more often in auctions, I believe this may have been an early release that was later replaced by the flag version.

## Pentel 5 ID Chart

A S55 Length: 141mm	Traits: Fixed Tip, Ribbed Grip, Grip about 2/3 length of Body, Wide space between end of Clip and end of body.
B PS535 Length: 140mm	Traits: Sliding Sleeve, Ribbed Grip, Black Body w/ Painted Silver Ring, Grip about 2/3 length of Body, Wide space between end of Clip and end of body.
C P545 (Long) Length: 142mm	Traits: Unique Tip and Ring between Tip and Grip, Space between end of Clip and end of Body is about 1/3 of length of body.
D P545 (Short) Length: 131mm	Traits: Unique Tip and Ring between Tip and Grip, Space between end of Clip and end of Body is about 1/4 of length of body (about size of large triangle sticker).
E Middle 5 Deluxe Length: 131mm	Traits: Fixed Tip, All Silver, Unique "Z" Ring between Body and Grip
F ML5 Length: 130mm	Traits: Fixed Tip, Silver Stepped Ring between Body and Grip, Grip about 1/2 length of Body, Wide space between end of Clip and end of body.
G SG Series Length: 132mm	Traits: Distinctive Tip, All Metal Body and Grip, Ring between Body and Grip, Colors: Silver, Black, Blue, Green, Brown, Gold, Black w/ Gold trim.
H P505 Length: 116mm	Traits: Fixed Tip, Smooth Grip, Grip about 2/3 length of Body, Narrow space between end of Clip and end of Body (about height of small triangle sticker).

# Pentel Pencils Identification Book

## Date Codes

As far as I can tell, up until about 1975 (smaller triangle sticker), Pentel did not put any dates on their pencils. You had to date the pencils in other ways; by catalog, stickers/tags, other information on the web, such as the [Good Design Awards](#), etc.

### 6-Digit Date Code

Then, around 1975, Pentel received their JIS Permit 375127, and their stickers transitioned to the larger triangle price sticker with the JIS Permit number on them. It looks like one thing they had to start doing was dating their products. For the most part, this involved printing the date on the lead reservoir in a 6-digit yymmdd format, the earliest of which I have found is 751200. Sometimes it would be a 5-digit code, looking like it dropped the lead digit of the year. These would have to be dated to the decade with other indicators.

# Pentel Pencils Identification Book

## 2-Character Date Code

At some point, Pentel decided to go to a more compact Date Code and came up with a 2-character code in a number-letter format. The number would be the last digit of the year, and the letter would be between A and L, representing the months of the year (A = January, B = February, etc. up to L = December), usually upper-case, but not always.

This is fine for dating lots of pencils that did not have multi-decade productions, but on pencils such as the P205, a 4D could mean April 1994, April 2004 or April 2014. Unless you had other information about the pencil, that was as far as you could go. Smaller productions, such as the DP325 Disney pencil (the earliest I have seen this version of the Date Code used) appears to have all Date Codes that we know of between 7C and 7F. With other indicators, such as the mold marks on the body of the pencil and the type of lead reservoir used, I believe these to be March to June 1977.

When under the clip (A, B, C, D, G), some of the codes are easy to read, but some (A & C) can be harder, depending on how deep the code was imprinted. Image C of a PD345 is hard to read, but I believe it says 6I, which would probably be September 1986, since I purchased it in the late-80's.

In the case of image E, this is a P225 with the code imprinted into the body at the end of the line of text on the side.

Many pencils will have the code printed at the end of the text (image F), as in the case of this PG514.

As I said above, the Disney DP325 has the code printed on the sticker that is wrapped around the lead reservoir.

In some cases, the Date Code is not to be found on the pencils, especially on some of the limited edition colors.

## Pentel Pencils Identification Book

### Excalibur Crown Pencils & Family

The Excalibur Crown-motif pencils are among my favorite Pentel pencils. Although all the pencils in this article are in the front of the book, they are scattered over more than 200 pages. Since finding the first two Excalibur pencils (Images 12 & 13) in this article, I wanted to put together as coherent a timeline as I can determine.

This article tries to track the history of, and changes to, the Pentel Excalibur Crown pencils. I am not including any of the pens (other than as side notes) or any of the later Excalibur items, Sword or carved.

Let's start this with what documentation we have. The oldest catalog I have access to that mentions this style pencil is the 1970 Japanese One-Sheet that was included with some pencils. This shows two pencils of this type, the first being a 0.3mm, and the second, a 0.5mm.

Image 01: 1970 Japanese One-Sheet – translation: "Sharp Silver / For Extra Fine Writing" – 0.3mm

Image 02: 1970 Japanese One-Sheet – translation: "Sharp Gold / Luxury Portable" – 0.5mm

As the translation for Image 01 states, it is a Sharp Silver, and the image reflects that. Image 02 translation says it is a Sharp Gold but looks to be drawn as a black pencil with lighter (gold) accents and does not have bands on the cap.

# Pentel Pencils Identification Book

The next two occurrences come from Pentel of America, in the form of Excalibur pencil and pen set brochures printed in 1971 & 1973.

## Excalibur

symbol of excellence  
for 13 centuries.

**S**ince Merlin the Sorcerer made the sword used by King Arthur, "Excalibur" has stood for excellence.

And now Pentel introduces a handsome gift set that lives up to this tradition.

The pen is a Rolling Writer that actually improves your handwriting. Thanks to its unique cushioned ball tip, it glides more smoothly, so you can write faster and easier than with any other type of pen. And since the richly colored ink is liquid, it flows the instant the pen touches paper. Rolling Writer... the liquid ink pen that can make carbons like a ball point. Its companion, the Sharp pencil, is also unique. Hand-assembled with watchmakers' tools, it feeds itself. There's no need to reload until a dozen leads have been used. To advance the lead just press the quick-click top. The secret behind the Sharp is an exclusive lead compound called Hi-

Polymer. It's blacker, smoother and stronger than normal lead, so each piece lasts twice as long.

Excalibur by Pentel . . . the pens and pencils that are indeed mightier than the sword.

To order the Excalibur in a distinctive gift box, just fill in the coupon below:

Quantity	Item	Price	Total

# Pentel Pencils Identification Book

**Excalibur!**

**Excalibur**, symbol of excellence for 13 centuries, lives again. This distinctive Pentel line is far mightier than the original Excalibur, King Arthur's sword. The current version has more amazing features than Merlin the Magician ever heard of.

The pen is the Rolling Writer, the liquid ink pen with unique cushioned ball tip. It's this unique cushioned ball tip that makes the liquid ink flow smoother, easier, faster. Its ink has richer color. And the Rolling Writer's durable ball tip makes excellent carbon copies.

The world's finest automatic matching Sharp pencil uses Pentel's Hi-Polymer 0.7mm EXTRA-FINE lead, 40% thinner yet stronger than regular fine lead. The pencil feeds itself. There's no need to reload until a dozen leads are used.

Available in two models: rich midnight finish, gold filled trim, \$8.50 for pen or pencil, \$17.00 for the set; luxurious hairline brushed chrome, \$7.00 for pen or pencil, \$14.00 for the set.

Whichever model you choose, you'll be selecting truly unique writing instruments, for yourself or cherished gift.

Image 07: Japanese 1980 catalog – silver pencils

# Pentel Pencils Identification Book

The full US catalogs that I have (1979, 1982, 1984 and 1985) all show the same Excalibur pencils, but do not have any of the SG pencils. The 1985 catalog shows:

Image 08: Pentel of America 1985 catalog, pg. 5 Excalibur Pens and Pencils

Image 09: Pentel of America 1985 catalog, pg. 5 Excalibur Gift Sets

One thing to note, although they contain the same model number pen and pencil (R10 & P1007), the EX12 Gift Set model number changed from the 1971 Excalibur Brochure (Image 03), where it was EX-15.

# Pentel Pencils Identification Book

Because the 1984 Olympics were being held in the United States (Los Angeles, California), Pentel of America decided to release several pens and pencils tied into that event. Several different styles of pencils were released, but for this article, we are only concerned with the EX20WO set and the PX7-21WO pencil.

Image 10: Pentel of America 1984 catalog, pg. 5 EX20WO Excalibur Olympic Pen and Pencil Gift Set

Apparently, there were many of these sets released, as even today in 2023, you can still find these relatively cheap on auction sites.

---

Going back to the first appearance in the 1970 Japanese One-Sheet, we have the Sharp Silver (SV) 0.3mm (Image 01) and the Sharp Gold (SG) 0.5mm (Image 02). These have now been confidently identified as the following two pencils:

Image 11: Unmarked SV

I came across some pictures of Pentel Excalibur and SG/SV pencils from a collector who is no longer with us, Germ of the Pencils11 blog ([bit.ly/Excal11](http://bit.ly/Excal11)). One of these pencils appears to be an unmarked silver pencil that is probably the pencil from the Japanese 1970 One-Sheet (see Image 01). Aside from the external differences from the SV (see Image 25) (no text below the clip, the early clip with vertical type Pentel, the stylized "P", and the early eraser cap), the internals have a major difference that links them back to the 60's design where the lead reservoir screws into the front of the grip with larger diameter threads than those that screw the tip on.

Image 12: Differences between internal Unmarked SV and "3" SV

# Pentel Pencils Identification Book

Image 13: SG (Sharp Gold)

I found out about the above pencil in an auction that I subsequently won. According to the box, it is a Sharp Gold (SG) and the shipping box says to come see Pentel at EXPO70. This is the pencil from the Japanese 1970 One-Sheet (Image 02). It has no markings below the clip, like the SV (Image 11), and is longer than all other SG/SV pencils by about 7mm. Other differences include the smooth eraser cap and the single piece tip (no pressed in pipe).

Soon after this, the Excalibur pencils seem to split into 3 different lines: the Crown-motif Excalibur pencils, the SG/SV pencils, and the Scepter pencils.

---

## Excalibur (SG-style) Pencils

The first appearance of actual US Excalibur Crown pencils has been identified on websites, and now in the hands of collectors.

Image 14: First Silver Excalibur / P1007 (US)

Image 15: First Black Excalibur / SG7 (US)

But in neither case, did we have model numbers, and in previous Pentel ID Books they were identified as Unknown Model 11 & Unknown Model 08. To get to how these were identified, let's look at the model numbers of the more modern (circa 79-85 US Catalogs) Excaliburs.

First off, you need to know that in Japan, all Excaliburs were 0.5mm, and in the US, they were 0.7mm, thus the different model numbers, but I never understood where these numbers came from for the US models (except the Gold Excalibur).

### PX20 / P1007

This is the brushed silver Excalibur with black print.

Image 16: PX20 (0.5mm), P1007 (0.7mm)

Both versions of this pencil also came in boxed sets with Rolling Writer pens. The Japanese set with the PX20 and the RX20 was PRX20. The US set with the P1007 and the R10 is EX12 (see Image 09). As a note, the RX20 & R10 pens are the same, just with different model numbers, depending on the country.

# Pentel Pencils Identification Book

## PX21 / PX7-21

This is the brushed gold Excalibur with black print.

Image 17: PX21 (0.5mm), PX7-21 (0.7mm)

The PX7-21 is the only 0.7mm Excalibur that you can see where the model number came from, taking the PX21 and sticking the “7-“, for 0.7mm, in the middle. This also seems to indicate that these two pencils came out at the same time, which also makes sense, as there was not a known all gold Excalibur before this.

Both pencils came in sets with the RX21 Rolling Writer pen. The Japanese set is the PRX21 and the US set is the EX20 (see Image 09).

## PX22 / SG7

This is the gloss black Excalibur with gold trim and print.

Image 18: PX22 (0.5mm), SG7 (0.7mm)

Both pencils came in sets with Rolling Writer pens, with the PX22 (0.5mm) / RX22 being the PRX22 Japanese version and the SG7 (0.7mm) / RG10 being the EX17 US version (see Image 09). Again, the RX22 and the RG10 pens are the same, just with different model numbers.

Now, it is easy to see that the Japanese model numbers were created sequentially (PX20, PX21 & PX22), but where did the US silver (P1007) and black (SG7) numbers come from? Neither I, nor any of the other pencil collectors I was in contact with had any idea.

# Pentel Pencils Identification Book

## P1005 and the ANSWER

Image 19: P1005

But in mid-April 2023, an auction went up on Yahoo Japan for a box of P1005 Excaliburs. Aside from being 0.5mm, they were identical to the first Silver Excalibur (Image 14), which made that model number **P1007**.

And everything starts to fall into place. The first US Excalibur was the Silver P1007 (non-SV version). This also made the first Black Excalibur, very likely, an SG7, where Pentel of America, just tacked on a “7” to the 0.7mm version of the SG (Image 15).

This now tells us where Pentel of America got their model numbers from. The first Silver Excalibur / P1007 was replaced by the 0.7mm version of the PX20, but they kept the same model number. And the same thing probably happened with the first Black Excalibur / SG7 with the 0.7mm version of the PX22; they kept the model number SG7.

These early model numbers have been confirmed by the discovery of a 1973 Excalibur brochure (Image 04).

## The Oddball “Excaliburs”

Image 20: P1007 (Version 2) “Excalibur”

Image 21: SG7 (Version 2) “Excalibur”

The two pencils above, P1007 (Version 2) & SG7 (Version 2), were pencils I received in Excalibur sets (with Excalibur marked pens). Being 0.7mm models, they are US versions and marked with a 7, but I wondered: 1) why I had never seen these model numbers before, and 2) why they were not marked as Excaliburs.

I have two of these SG7 pencils; one being the one in the photo above, and the other is part of a monogrammed set (proving that they went together) for The Mitsui Bank of California, which appears to have opened in 1972. I suspect that this Excalibur set was a give-away for either employees or high value customers. Either way, that gives us a rough date for both sets.

What I suspect is that Pentel of America had run out of the first Excaliburs, but Pentel Japan had not finished the design for the new Excalibur pencils (PX20 & PX22). Therefore, I believe that Pentel of America had a run of the SV and SG15 pencils made in 0.7mm and stamped with a “7” as a stopgap and was thus a very limited release.

As an aside on the early Excaliburs, we know that the first Excalibur in Silver was the P1005/P1007, and the first Black US Excalibur was the SG7. I suspect that Pentel Japan did release an SG5, but I have not seen any of these show up on auction sites, nor seen any mention of them anywhere.

# Pentel Pencils Identification Book

## SG/SV Pencils

The SG/SV Pencils appear to be a descendant of the original Sharp Silver (SV) (Image 01) and Sharp Gold (SG) (Image 02) from the 1970 Japanese One-Sheet and have the same “gear-style” middle ring, plus the information below the clip, consisting of Pentel, then the stylized number representing the size, then below that, Japan, and nothing on the clip.

### SG15

This pencil is the same color of matt black with gold trim as the pencils in Image 13& Image 15, but with the 5 stamp on the front.

Image 22: SG15

The Japanese 1980 catalog (Image 06) lists this as the SG15 and I have seen it referenced this way elsewhere online. The sticker on the SG15 above is from about 1976 to the early-80's.

### SG65

This pencil is listed in the 1980 Japanese catalog (see Image 06) as the SG65.

Image 23: SG65

Although, not as brilliant as the SG75, it is a brushed solid gold color.

### SG75

The last of the SG pencils listed in the 1980 Japanese catalog (see Image 06).

Image 24: SG75

This is a gloss gold pencil with black pin stripes. I have been told that the striping on this is sometimes referred to as Tiger Stripes.

# Pentel Pencils Identification Book

## SV / SV5

These pencils are all made of brushed aluminum.

Image 25: SV Silver, SV5 Silver, SV5A Black, SV5C Blue, SV5D Green & SV5E Brown

These pencils are commonly called the SG33, SG35 & SG45, and for a long time, that is how I had them listed. I have always questioned why they were called SG when they are not Sharp Golds but are based on the Sharp Silver (Image 01).

In the Japanese 1980 catalog (see Image 07) the silver pencils appear to be the ones listed there as SV and SV5. The SV is one of the most common SG/SV pencils that I find on auction sites. I have found this pencil with the early smaller triangular sticker (pre-76) to larger JIS triangular sticker up to the square sticker from the mid-80's.

I recently came across a photo of a box of the Green pencils in an SV5 box with the Green "E" sticker on the end, thus confirming these to be SV5 pencils.

I suspect that these pencils picked up the SG33/SG35/SG45 numbers due to some of the other Pentel sets, such as the Pentel Slim (PS35, PS45 & PS65). Since there was little documentation of the SV/SV5 model numbers, and the SG series has the SG65, my guess is that people assumed that these were SG33/SG35/SG45, and that is the now common model number discussed for these pencils. Since the SV5 color pencils were not listed in the 1980 catalog, and all of the date codes I have found for these are 1978 or prior, they were discontinued by that point.

# Pentel Pencils Identification Book

## Scepter Pencils

The first Silver Excalibur in Image 14, thanks to the ring in the middle, appears to be a direct ancestor of the Scepter pencils.

Image 26: Scepter Pencils, top to bottom; Silver Plated, Gold Plated and Sterling Silver

These pencils have dropped the Excalibur logo, and have the Pentel name on the clips, but not the stylized “P”. The Gold-Plated and Sterling Silver versions (bottom two in above picture) did have the name printed on the ring in the middle of the pencil.

The Scepter line had a second run, with minor changes to the tip, clip and eraser, but appears to have been discontinued after that run of pencils.

---

## Evolution of the Excalibur Crown Logo

Image 27: Evolution of the Excalibur Crown Logo

Logo 1 – Simple line drawing of the Crown above the logo-style Pentel, stamped into the body of the pencil/pen. (source Early P1007 Excalibur)

Logo 2 – Outlined Crown above the logo-style Pentel, stamped into the body of the pencil/pen. (source R10 Excalibur Gen 1)

Logo 3 – Outlined Crown above Excalibur name, stamped into the body of the pencil/pen. Pentel stamped on the back of the pencil/pen. (source RG10 Excalibur Matt Black)

Logo 4 – Filled Crown above Excalibur name, printed on the body of the pencil/pen. Black fill on Silver and Gold, Gold fill on Gloss Black. (source Late P1007 Excalibur)

## Graph II vs PG5

### Graph II

### PG5

This article puts together the images from the Graph II and the PG5 all on one page, so you can see the differences between them without having to flip back and forth over 100 pages.

The original Graph pencil came out in 1965 and was a very successful pencil. In 1968, Pentel released the *Mechanica*, which, I believe is the first Pentel pencil to have a lead indicator ring. In 1970, Pentel released the *PMG*, which was based on the Graph body, with a different tip and a cap.

About the same time, Pentel decided to update the Graph, to add a lead indicator ring. They took the Graph and shrunk down the Connector end to add a ring with the lead hardness' and a second window ring. When they shrunk down that end, the lead reservoir would no longer fit through the back end, so they had to take a design from some of the other 60's pencils and had it screw in from the front with a 5mm thread and kept the standard 4mm thread to screw the tip onto. This resulted in the Graph II pencil.

This design was not as production friendly as the Graph and the *PMG*, so another redesign was made to make the Connector into a separate piece, allowing the lead reservoir to drop into the back, then the Connector (with lead hardness sticker already applied) to just screw into the back. This design was called the *PG5*.

There are three external indicators I know of that can help identify the difference between the two pencils. First, is that the Graph II will not have any printed text on it, although some of the very early *PG5*'s did not either. Second, and most likely to be seen on an auction site, is the size of the lead indicator font on the Graph II is larger. The next identifier is hard to see on auction sites, but on both pencils, in one of the cutouts, just behind the grip, is the name Pentel. On the Graph II, it is in the old-style font, and on the *PG5* it is the newer font, like on the front of this book.

As I have recently discovered, the early *PMG* is designed the same way as the Graph II.
